Cardiopatía hipertensiva pdf

Figura 11-13. Hipertrofia ventricular izquierda (HVI). A, hipertrofia por presión debida a obstrucción del tracto de salida del ventrículo izquierdo. El ventrículo izquierdo está en la parte inferior derecha en esta proyección apical de cuatro cámaras del corazón. B, alteración de la configuración cardíaca en la HVI con un grosor aumentado, observada en cortes transversales del corazón. En comparación con un corazón normal (arriba), la cámara anterior y dilatada (abierta) tiene un aumento de la masa pero un grosor parietal normal. Recent findings indicate that ventricular hypertension may be associated with new apoptotic and fibrotic mechanisms (for example, alterations in the activated receptor for peroxisomas proliferator) that can lead to new approaches for the prevention of heart failure in patients with Hypertensive cardiopathy. *Sisthetic arterial hypertension The full text is available in PDF* Copyright ©, © 2007.
